Unlocking Learning Potential

January 2010

Happy New Year from the Center for Neuro Development!

We are bringing in the New Year with some changes. Our mailing addresses are listed above, but the physical address for most of our activities: 8323 95th St SW Lakewood, Washington 98498. Please use our P.O. Box for all mail.

Dr. Young has graciously allowed us to continue doing our informational meetings in his complex. We have vacated 8907 Gravelly Lake Drive, but we will be using the reception area on the back / left corner (as you enter the complex from the street) of the building in front of our former building. The entrance we will be using has 8907 beside it (Dr. Kiefer has a sign next to the door as well). For January we will have our regular, second Monday of the month at 6:00 p.m. – January 11, 2010. These monthly meetings are free. Stay tuned for additional opportunities for February.

We continue to offer Neurodevelopmental screenings by appointment during the week following the 2nd Monday of the month informational meeting. See our other offerings on the attachment. Information regarding dates and registration for Standardized tests for homeschoolers will be available later.

Also, we have a number of products and materials for sale:

- Used books and curriculum
- New Christian books
- New Homeschool Helps materials
- New Special Helps materials
- Chemistry equipment in a 3 drawer cabinet on wheels

You may browse our products when you come for an appointment or simply call ahead for a time when you can shop.

Next month we will resume our regular E-newsletter with a neurodevelopmental article.
